

Compact Price List

as of 01.01.2026

Note on our prices

Vaccination consultations and vaccinations in accordance with the Swiss Vaccination Schedule are services covered by the mandatory health insurance (KVG), exempt from the deductible, and billed according to TARDOC; therefore, no fixed prices are shown for these services.

Travel-specific consultations and vaccinations that are not covered by health insurance are considered self-pay services and are charged at CHF 20.00 per started 5 minutes (vaccine costs: charged separately).

Important reminders:

- For combined services, you will receive two invoices (KVG + self-pay).
- Please bring your Swiss health insurance card.
- We will be happy to inform you in advance about the expected costs.
